

DATA SHEET

Cloudleaf Safe2Go™

Re-start your business while keeping employees and customers safe and healthy

Cloudleaf Safe2Go is a software application that enables businesses to plan a safe and thoughtful return to work. Safe2Go is an easy to deploy, cost-effective, confidential temperature and location monitoring solution for social distancing and employee health as well as a mobile app. Safe2Go keeps both customers and employees safe by monitoring employee entry/exits and dwell times and as well as monitoring employees' temperatures in real time in the workplace. The Safe2Go solution provides businesses with a COVID-19 Health & Safety dashboard, analytics, alerts, incident resolution features, and employee reference checks against contact-trace databases.

BENEFITS

Continuous Visibility into Body Temperature and Location

- Control tower views with dashboard, analytics, alerts, incident resolution
- Dwell times, temperature excursions, proximity alerts
- Improved accuracy in proximity/contact tracing

Protects Employee Privacy

- Data received only within company specified locations (geo-fenced)
- No PPI data is collected or saved in the platform
- Data collected automatically and visible only in Health & Safety dashboard

Reduced Disruption to Operations and Improved Compliance

- Easy employee onboarding
- Fully automated — no compliance gaps from manual process failures
- Easy to deploy
- Lower health liabilities and risk to operations disruption
- Frictionless, single touch deployment with wrist band, mobile app and cloud solution
- Consolidated control tower gives real-time view across operation

FEATURES

Real-Time Temp and Blood Oxygen Monitoring

Real-time body temp, blood O2 and location monitoring during work hours

Safe Site Capacity Monitoring

Real-time alerts when safe site capacity is at risk or exceeded

Single View and Dashboards

Single, integrated platform across your operations
Dashboards showing geofences, dwell times, temp excursions and proximity alerts

Reference Checks Against Contact-Trace Database

Integration with COVID-19 contact tracing databases where available

Easy to Deploy, SaaS-Based

SaaS-based platform can be paired with a personal device such as a wristband, ring or badge

Secure & Confidential

No PPI information retrieved or stored, all anonymous triggers

Custom, Real-Time Alerts to Organizations

Health & safety team control tower with dashboard, analytics, alerts, incident resolution

Manage by Exception

Receive real-time alerts when there is a temperature excursion or proximity issue

Mobile-Enabled Customer Apps/Alerts

Frictionless, single touch deployment with wrist band, mobile band, and cloud solution

Cloudleaf's Safe2Go™ Solution Allows a Safe and Seamless Transition Back to Work

COVID-19 sensor band, paired with a mobile app continuously captures and sends body temperature data/location data to your dashboard
